NETSTAR TRAILER MANAGER

***MANAGE YOUR TRAILERS &
IMPROVE YOUR BOTTOM LINE***

YOUR CHALLENGE

PROTECT YOUR DETACHABLE ASSETS

Protecting your fleet often goes beyond tracking your vehicles and drivers. Criminals often target assets that detach from your fleet for the trailer and valuable loads. This results in loss of revenue, increased costs and decreased customer satisfaction.

Fleets with detachable assets need to:

- Maximise the use of trailers
- Minimise theft
- Increase recovery
- Reduce loss of loads

ENHANCE TRAILER VISIBILITY & PREVENT LOSS

Gain real-time visibility of your detachable fleet assets with the Netstar Trailer Manager. Movement notifications and visibility reduce your operating costs by increasing trailer usage efficiencies, resulting in customer retention.

Detachable assets require a solution that is powered when connected to a vehicle, but still operates on battery when trailers are detached. The Netstar Trailer Manager does exactly that – with a long battery life your assets remain secured.

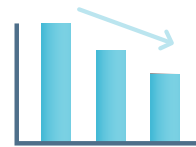

NETSTAR TRAILER MANAGER IN ACTION

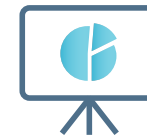

The unit charges when attached to the vehicle.

The battery powers the unit when it stands alone.

Manage: Monitor and manage your assets with real-time data and alerts.

Improve: Transform your business with better trailer usage and efficiencies.

Act: Keep your assets tracked to reduce loss and increase recovery.

KEY FEATURES & BENEFITS

Real-time and Buffer Locations

Ensure visibility with real-time location updates up to 3 seconds. Up to 60000 location points can be saved in the buffer if outside of network coverage.

Movement Alerts

Prevent theft and loss with alerts for asset moving and parking.

Disconnection Alerts

Know when trailers are detached with alerts for devices disconnected from power.

Sensor Compatible

The Netstar Trailer Manager is compatible with multiple Netstar sensors, which provide additional visibility and protection.

Configurable Inputs

Digital or analogue input.

Large Backup Battery

9600mAh/3.6V battery to run for up to 20 days (5-minute reporting) or over 3 months with 2 daily updates while stationary, without charging.

Easy Installation

It can be mounted with magnets, screws, polyurethane or heavy-duty tape by end users.

Digital Outputs

Compatible with wiring relay, buzzer and siren for vehicle immobilisation for anti-theft.

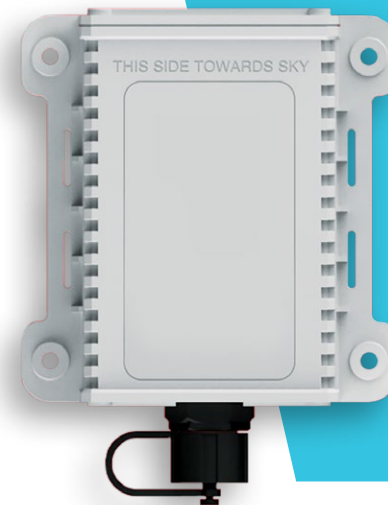

Rugged Construction

Thick and solid casing and rugged construction for outdoor uses.

IP67 Waterproof

It was tested in a 5-metre water pressure environment for 15 hours.

Typical vehicles that require a trailer management solution:

- Flatbed Trailers
- Dry Van Trailers
- Construction Vehicles
- Heavy Equipment
- Freight Transport
- Caravans
- Trailers

THE RESULT

HOW NETSTAR TRAILER MANAGER BENEFITS YOU

Using Netstar Trailer Manager keeps you covered from pick-up to drop-off. We empower you to easily assign drivers to trailers, manage routes, monitor cargo and drive delivery.

INCREASE UTILISATION

Real-time visibility helps you optimise routes and driver assignments.

REDUCE THEFT

Always know where your trailers are with alerts, long battery life and data.

PROTECT LOADS

Monitor sensitive cargo and avoid delays with Netstar Trailer Manager.
