ALTRON
DIGITAL BUSINESS

South Africa's technology leader
in data and AI.

Altron Digital Business Data and AI is your South African partner in unlocking innovation, intelligence, and opportunity through data and AI-driven solutions.

Our deep local expertise, end-to-end capabilities, and unrivalled partner ecosystem enable us to transform complex data landscapes into valuable, actionable insights. Whether your organisation seeks cost savings, efficiency improvements, risk mitigation, or new revenue streams, we help realise your business ambitions through intelligent data solutions.

We operate, optimise, and transform data ecosystems, ensuring that your organisation remains competitive, compliant, and ahead of the curve.

Your strategic technology partner

As your trusted data and AI transformation partner, we provide an integrated approach with a wide range of capabilities, including:

→ **Data strategy and advisory.** Aligning business goals with scalable data solutions.

→ **Cloud and hybrid data solutions.** Secure, agile, and cost-effective data migration and storage.

→ **AI and Machine Learning frameworks.** Unlocking intelligence to enhance decision-making.

→ **Data engineering and integration.** Consolidating disparate data sources for real-time insights.

→ **Data governance & compliance.** Ensuring security, privacy, and regulatory alignment.

→ **Managed data and AI services.** Proactive monitoring, optimisation, and cost control.

Let us help you create a strong data foundation, integrate AI-driven intelligence, and optimise your data ecosystem for measurable business impact.

Strategic, integrated solutions

Backed by 60 years of local expertise, we will help you:

Transform data into insights

- Consolidate, clean, and structure data for clarity and usability
- Enable real-time decision-making through advanced analytics
- Unlock cost savings, efficiency gains, and revenue opportunities

A leading bank replaced 250 separate platforms with a single data platform, achieving a lower cost per query than any other provider.

Shape data into intelligence

- Deploy AI-driven predictive models to improve outcomes
- Automate manual processes to boost efficiency
- Enhance decision-making with machine learning insights

A financial regulator saved 10 days per investigation by using AI-powered document scanning to process bank statements.

Operate and optimise your data ecosystem

- Ensure 99.9 percent uptime and high system adoption rates
- Balance data costs while maximising business impact
- Drive ongoing optimisation through expert-managed services

A telecoms operator loads 1.8 billion transactions daily with a 99.9 percent SLA uptime, ensuring seamless operations at scale.

Why choose Altron Data and AI?

We are the right partner for you because we have:

→ **Proven expertise,** with 160+ qualified data professionals with 200+ specialist certifications

→ **Recognised leadership** as a Microsoft Data and AI Partner of the Year for 17 years

→ **Advanced capabilities** as one of only four partners in South Africa with Advanced Specialisation in Azure Analytics

→ **Local market leadership** offering on-the-ground support and data sovereignty as standard

→ **An analytics factory that goes beyond traditional service levels** to guarantee measurable business impact (XLAs)

Choose Altron to operate, optimise, and transform your data landscape.

Choose us to unlock your business advantage by turning data into insights.
